DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Mikhail et al. ('357).

Mikhail et al. discloses a catheter comprising a flow control membrane (38). The flow control membrane comprises a plurality of slits (76). The slits are substantially symmetrical about either a line of symmetry, diameter, major axis or a point. (See Figures 21-35) The flow control membrane is composed of silicone rubber. (See Column 18 Lines 46-58) The flow control membrane is taught to be shapes other then circular such as oval. (See Column 27 Lines 64-65)

Response to Arguments

Applicant's arguments filed 12/06/2006 have been fully considered but they are not persuasive.

In response to the Applicants' argument that Mikhail does not disclose a "pressure actuated valve including a flow control membrane... including a plurality of slits extending therethrough, wherein, when the membrane is acted upon by a pressure of at least a threshold magnitude, the slits open to permit flow", the Examiner

Art Unit: 3763

respectfully disagrees. The Applicant argues that the device of Mikhail is designed to be opened by a squeezing force and is not opened by fluid pressure. However, there is no limitation in the claim that requires the valve to be opened by fluid pressure.

Furthermore, even if the fluid pressure were claimed, the device of Mikhail would still meet this functional limitation. The Applicants' contention that "the valve of Mikhail is designed to remain sealed at all times regardless of the pressure applied thereto" is incorrect. While the valve is designed to resist normal pressures associated with urine drainage, there is obviously a flow pressure at which the valve would open.

In response to the Applicant's argument that Mikhail does not disclose a plurality of slits with each of the slits extending "between end portions thereof along a curve and wherein a distance between a first end portion of a first one of the slits and a first end portion of a second one of the slits is a minimum distance between the first and second slits", the Examiner respectfully disagrees. The Applicant has merely stated this limitation is not anticipated and has not provided any substantial arguments to support this statement. The Examiner contends that this limitation is anticipated.

In response to the Applicant's argument that Mikhail does not disclose a "substantially planar elastic membrane", the Examiner respectfully disagrees. The term planar simply means "lying in a plane". The valve (38) certainly lies in a plane.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Stigell whose telephone number is 571-272-8759. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
